

Important :
The excavation dimensions correspond to the minimum concrete foundation ensuring impact resistance.
Adapt them to facilitate connections or other operations performed by your personnel.

INSTALLATION METHOD:

- Carry out the excavation.
- compact the bottom of the excavation
- Sling the bollards and place them in the excavation.
- Place the twisted concrete steel in position (see drawing).
- Level the bollards (in both axes).
- Block the bottom of the bollards with concrete.
- Fill the entire excavation with concrete, leaving 8 cm for the floor finishes.
- Finish the floors.

INSTALLATION PROCEDURE

AMCO LES ESCAMOTABLES
LEA GROUP

20, Z.I. de l'Aspre
30150 Roquemaure
04 66 33 25 70

F25-60A-1548-TFP

Fixed security bollard Ø25 HT60 very shallow depth in ground beam

Mass of a bollard (excluding reinforcement): approx. 65 kg

Concrete specifications:
- Mini BPE C40/50 class
- Minimum dimensions of the foundation for firm ground
- Dimensions to be adapted according to specific site constraints
